

Working for the energy transition ... Living where others go on vacation ...

WIND

WIND-consult

WIND-consult - over 30 years independent measuring institute and accredited test laboratory for wind energy with expert opinions / test reports for planning, operation, monitoring, testing and trial of wind turbines worldwide.

Our location in the windy north, near Rostock, is the ideal environment for committed work and high-quality life on the Baltic Sea coast.

We are looking for Graduate Engineer, Master, Bachelor (m/f/d) for Noise measurements / Immission prognoses

- Tasks:
- Noise measurements on wind turbines (WT) at domestic/abroad
 - Evaluation of measurement data, statistical analyses
 - Work with measurement and prognosis software (e.g. IMMI)
 - Preparation of test reports on emission/immission measurements, sound immission and shadow flicker forecasts
 - Participation in technical and standardization committees

- Requirements:
- Studies in the field of acoustics, electrical engineering, mechanical engineering, Measurement technology, physics or similar
 - PC knowledge (standard, measurement & evaluation software)
 - Experience in the preparation of test reports and expert opinions according to standards / guidelines desired
 - Language skills in German & English (spoken and written)
 - Driving license for passenger cars
 - Interest in work assignments / travel at domestic and abroad
 - Committed, independent and reliable work
 - Responsible customer care
