

Working for the energy transition ... Living where others go on vacation ...

WIND

WIND-consult

WIND-consult - over 30 years independent measuring institute and accredited test laboratory for wind energy with expert opinions / test reports for planning, operation, monitoring, testing and trial of wind turbines worldwide.

Our location in the windy north, near Rostock, is the ideal environment for committed work and high-quality life on the Baltic Sea coast.

We are looking for Graduate Engineer, Master, Bachelor (m/f/d) for Wind potential and energy yield assessments

Tasks:

- Modelling of wind field & energy yield of wind turbines (WT) with standard software (e.g. WASP, WindPRO)
- Execution of wind measurements (configuration, installation and maintenance of measuring equipment, evaluation, reporting)
- Data evaluation and statistical analyses
- Site inspections at domestic and abroad
- Preparation of test reports according to standards & guidelines
- Participation in technical and standardization committees

Requirements:

- Studies in the field of meteorology, physics, earth sciences
- PC knowledge (basic knowledge / MS-Office, EXCEL)
- Experience with software WASP & WindPRO, statistical evaluation and measurement technology & data logger desirable
- Language skills in German & English (spoken and written)
- Driving license for passenger cars
- Interest in work assignments and travel at domestic and abroad
- Committed, independent and reliable work
- Responsible customer care
