

Working for the energy transition... Internship where others go on vacation...

WIND

WIND-consult

WIND-consult - over 30 years independent measuring institute and accredited test laboratory for wind energy with expert opinions / test reports for planning, operation, monitoring, testing and trial of wind turbines worldwide.

Our location in the windy north of Germany, near Rostock, is the ideal environment for dedicated work and active leisure activities on the Baltic Sea.

We offer students (m/f/d) an internship in the task area of

Acoustics of wind turbines (WT)

Tasks:

- Assistant at Noise measurements on wind turbines
- Configuration and installation of Measurement technology
- Data evaluation, statistical investigations
- Further development / programming of evaluation methods
- Participation in noise propagation and shadow flicker forecast

Period:

Start immediately / Duration minimum 3 months
a subsequent BACHELOR / MASTER THEME can be derived

Skills:

- Previous knowledge/studies in the field of acoustics / measurement technology / physics / electrical engineering
- Interest in measurement acquisition and evaluation, statistics, measurement configuration and installation
- Interest in configuration & commissioning of measurements
- Computer skills (MS Office, especially EXCEL)
- Programming (e.g., VBA, Python, Matlab)
- Driver's license for Germany (class B)
- Committed task processing
