

Working for the energy transition ... Living where others go on vacation ...

WIND

WIND-consult

WIND-consult - over 35 years independent measuring institute and accredited test laboratory for wind energy with expert opinions / test reports for planning, operation, monitoring, testing and trial of wind turbines worldwide.

Our location in the windy north, near Rostock, is the ideal environment for committed work and high-quality life on the Baltic Sea coast.

We are looking for Graduate Engineer, Master, Bachelor (m/f/d) for Measurements on wind turbines (WT)

Tasks:

- Measurements on WTs (preparation, installation, support)
- Measurement, evaluation and testing activities according to national and international standards and guidelines
- Preparation of test reports, certificates and technical documentations
- Measurements at WT sites at domestic and abroad
- Participation in technical and standardization committees

Requirements:

- Studies in the field of electrical engineering, measurement technology, physics or similar
- Interest in measuring and testing tasks at / on wind turbines
- PC knowledge (standard, measurement & evaluation software)
- Programming knowledge desirable
- Language skills in German & English (spoken and written)
- Driving license for passenger cars
- Interest in work assignments / travel at domestic and abroad
- Committed, independent and reliable work
- Responsible customer care
